# Timely Grading Proposal 

-3/22/2021-

Proposed by Eli Weiss, Evan Beller

Teachers should, unless taking a leave of absence or chaperoning a school trip, grade all work or tests assigned within three weeks of submission by the student.

If not graded in the allotted time, the teacher may not assign any more tests or major projects until the assignment/s are graded.

## Reasoning:

Teachers grading work in a timely manner allows students more time to get their grades fixed and gives them extra
motivation on future assignments to improve their grade. If the student does not get their grades until a week before the
quarter ends, then their options become slim as the time to improve grades is low.
